

## Chemical Vocation "The Road"

Visit "[The Road](#)" on MotoLyrics.com

As day turns into night  
We say our goodbyes  
'Cause time has never been on our side

A train away  
Three hours straight  
I'm placed on hold

And you wish that I  
Will pay you more attention and I will

Let me be the one tonight  
Who's gonna lead you through safely  
Let me be the one to hold  
Your hand and walk you down towards misery

As days went down the drain  
Thoughts messed with my brain  
And I felt that my heart was failing

I'm all out of words now  
And I'm sorry for the hurt  
And you wish that I  
Would have payed you more attention than I did

Let me be the one tonight  
Who's gonna lead you through safely  
Let me be the one to hold  
Your hand and walk you down towards misery

I know that there's too much going on  
There's too many roads to walk on  
But there's no need to sweat  
'Cause there's not one of them who's not gonna  
Lead you towards misery

Let me be the one tonight  
Who's gonna lead you through safely  
Let me be the one to hold  
Your hand and walk you down towards misery
