"Think It Over"

Visit "[Think It Over](#)" on MotoLyrics.com

You said you needed time to think it over
You said I was too young for you to care
And you wanted me to wait till you were sober
Before you said the things you didn't dare

Well, I've been growing for so long
That I could teach you in a song
Ageless minds attract each other
Learn from love and not from numbers

Think it over, think it over
Do do do do...

I been open to your love for ages
But you can't see the forest for the trees
You treat me like I'm
Just your little angel
But I'm a woman wanting you to see

That I've been growing for so long
That I could teach you in a song
Ageless minds attract each other
Learn from love and not from numbers

Think it over, think it over
Do do do do...

You keep your love from me for sake of others
And what we have is nothing for ourselves
The consciousness to be eternal lovers
Is something that you can't deny yourself

'Cause I've been waiting for so long
To try and hold you

Do do do do do...
Think it over, over
Do do do do do...
Think it over, over
Do do do...
