Dog man star took a suck on a pill
And stabbed a cerebellum with a curious quill
Europe, America, Winterland

Introducing the band

Chic thug stuttered through a stereo dream
A fifty knuckle shuffle heavy metal machine
The tears of suburbia drowned the land

Introducing the band

So steal me a savage, subservient son
Get him shackled-up, bloodied-up and sucking on a gun
I want the style of a woman, the kiss of a man

Introducing the band

And as the sci-fi lullaby starts to build
See them whipping all the women, cracked
governments killed
Oh let the century die to violent hands

Introducing the band
