

Children Within "Depart"

Visit "[Depart](#)" on MotoLyrics.com

Open your mind
It's the way away
From this grey world
And see the graceful sights
During enlightened nights
Spacewaves reaching us
We're so aware
Swelling with a steady flow
Shining with a constant glow
Open your heart
Be aware of the cosmic pulse
Search for a new dimension out there
Behold it all
Gravitational waves affecting our lives
Holding us tied to this home

Neutralize them with your thoughts and depart
Awakening from our ignorant sleep
We see much more
Understanding the pointless things
Which we used to worry for
Please hurry
I'm waiting for you
And I don't look back
There's nothing left for us
Gravitational waves affecting our lives
Holding us tied to this home
Neutralize them with your thoughts and depart
