

Children Within "Pressure"

Visit "[Pressure](#)" on MotoLyrics.com

Through the surface I will break out
Dissolving in the air free
I've been locked up through the cold
Breaking loose when I get warm
The pressure is rising every day
It suffocates me in every way
And the walls that keep me here
Are closing in
Pressure drop will rearrange me
The liberty of action
To never stop is what strives for
The wind will take me higher

The pressure is rising every day
It suffocates me in every way
And the walls that keep me here
Are closing in
Turbulence has made me stronger
The storm has gone away now
I have reached the altitude
From now on I'm going downhill
The pressure is rising every day
It suffocates me in every way
And the walls that keep me here
Are closing in
