"This has been the best period in our existence, the most successful, the most promising one, a period in which the band pruned to become as much professional as it was possible. And I must say we really succeeded. Just take a look at the album's artwork, everything has been done perfectly in each smallest detail. The sound is another thing we may discuss on now...this time we entered much better studio SELANI (the one VADER and CHRIST AGONY used for their last albums) and it's audible for sure. It's much clearer this time, you can't say a bad word about

it...all the instruments are exposed in much better way. The only thing I can complain on is the promotion done by SOLISTITIUM REC. which in fact was none. No advertisements in pro-press, well, yeah, we did the widest European tour so far, in company with ANCIENT and BELPHEGOR, but it didn't help that much selling's numbers...Anyway, this album should be seen as a first professional step towards becoming a top band...this is a real proof we do our best to achieve our goals and we'll definitely follow that way, that's more than sure."
