

## **Behind Enemy Lines "Faceless"**

Visit "[Faceless](#)" on MotoLyrics.com

From the age of the thought police- greetings  
From the age of big brother- greetings  
From the age of newspeak- greetings  
Welcome to the age of continuous warfare  
We are the free; we are the peaceful  
They're the aggressors and they are the hateful  
Who are they?  
We're defending democracy; we're protecting our  
borders  
They resent freedom and they utilize terror  
Who are they?  
They lurk in the shadows  
Endlessly plotting to destroy our very way of life  
If you do what we say then everything will be fine  
We will protect you as we live in the age of  
Faceless  
Nameless  
Endless  
War  
Who controls the past controls the future  
Who controls the present controls the past  
We have that control  
You submit to authority when you're residing in fear  
So don't ever question and don't you dare criticize  
Don't believe what you see, just accept what you hear  
It's in your best interest that your knowledge is purged  
It's a beautiful thing the destruction of words  
War is peace  
Freedom is slavery  
Ignorance is strength  
It's a beautiful thing the destruction of words  
Once we control what's spoken we'll see no more  
dissension  
Just politicized images to skew your perception  
You can't trust your own judgment; you can't trust  
yourselves  
So we will protect you from yourselves  
We will protect you; we will protect you  
You are a threat to yourselves  
So we will protect you  
  
You are a threat to yourselves

So we will protect you  
It doesn't matter if victory is possible  
This war is not meant to be won  
It is meant to be continuous  
And that's only possible on the basis of ignorance  
The most practical way to keep our power structure  
intact  
Is to keep society on the brink of starvation  
So we, as the ruling class, will maintain our power  
By waging war against our own population  
We will break you" we will break you  
Keep your dissent to yourselves  
Or we will break you  
Keep your dissent to yourselves  
Or we will break you  
Here comes a candle to light you to bed  
Here comes a chopper to chop off your head  
From the age of the thought police- beware  
From the age of big brother- beware  
From the age of newspeak- beware  
Beware of the motive in continuous warfare  
You may think we are free' you may think we are  
peaceful  
But we're the aggressors and we are the hateful  
Who are we?  
We dismantle democracy; we invade others' borders  
We repress freedom and we utilize terror  
Who are we?  
We'll drive you into the shadows  
Forever destroying your very way of life  
If you're not on our side then you'll be in our sights  
There's no neutrality in our "war on terror"  
We are the enemy; we are the enemy  
Take a good look at ourselves  
Because we are the enemy  
Take a good look at ourselves  
Because we are the enemy
