Lady, does he love you like I love you? Is he crazy 'bout  
you, baby?  
And baby, did you tell him what you told me 'bout you  
thinking  
'bout me lately?  
Don't tell me what you want, don't you say "maybe"  
Just tell me when you've done what you said you would  
do for me  
That's why I

I tried to change it, tried to erase it, but I'm always  
coming back to you  
You tried to take it, then rearrange it  
'Cause you always play them games you do  
You say to believe it, you feel it  
but there's only one thing that is true  
It's that I've got a reason, that I've got a reason with  
you

I understand it's hard, but understand my heart has  
waited for a long time  
And even though you told me "no" I never took it  
'cause I knew that you were not right  
I tried chase away the thoughts inside my mind  
But now I've got a problem, gotta solve it  
'cause I caught you in this love crime  
That's why I, I, I

I tried to change it, tried to erase it, but I'm always  
coming back to you  
(Coming back to you)  
You tried to take it, then rearrange it  
'cause you always play them games you do  
You say to believe it, you feel it  
but there's only one thing that is true  
It's that I've got a reason, that I've got a reason with  
you

I ain't gonna be the man on the side  
Holding out for what was never right  
'Cause I can wait to see what love will do for me

But I'm not some man that's a back-up plan  
That's here for the ride

But I tried to change it  
I tried to change it, baby

I tried to change it, tried to erase it, but I'm always  
coming back to you  
You tried to take it (take it), then rearrange it (you  
know)  
'Cause you always play them games you do  
You say to believe it, you feel it  
but there's only one thing that is true  
It's that I've got a reason, that I've got a reason with  
you  
Baby, I've got a reason to talk to you  
Tried to change it, tried to erase  
but I'm always coming back to you  
You tried to take it (take it), then rearrange it (you  
know)  
'Cause you always play them games you do  
You say to believe it, you feel it  
but there's only one thing that is true  
It's that I've got a reason, that I've got a reason with  
you
