[Spoken]

Check this out girl

I know you sitting back saying to yourself

"I know he ain't trying to holla!"

Naw

[Laughs]

[Intro]

But there's something I got to tell you

Oh yeah, Oh yeah

You ain't got to do it though

And I just want you to sit back and listen

While I sing this song to you

Check me

Listen

[Verse 1]

It's not the hardest thing for me to say

Without cracking a smile

It's something that we both really feel inside

But never talked about

They call in love

Oh yes they do

A dangerous thing, when you're part of the game

So girl I feel you when you get emotional

And don't want to let me go

But there's something I got to tell you

[Chorus]

I don't mean to cut you off but the question is:

So when you gone be my girl? (When you gone be my girl?)

I want to know

When it comes to loving, (why) you change the subject  
(you should know)

And girl you know that I'm the man (you want)

Oh yes I am

Girl what's really good with you?

(So when you gone be my girl?) When you gone be my girl

All this breaking up, is getting old now

So baby tell me where I stand

[Verse 2]

I know

You probably saying to yourself this brotha tripping but

This stuff is real

But ain't true men that felt love will have the nerve to  
step up

And tell that baby what's up

To let her know he's really impressed

Now getting straight to the bottom line

You're the type of kind of girl a gangsta needs by his  
side

So when you get emotional

I won't let you go

There's something I got to tell you

[Chorus]

I don't mean to cut you off but the question is:

So when you gone be my girl? (When you gone be my  
girl?)

I want to know

When it comes to loving, (why) you change the subject  
(you should know)

And girl you know that I'm the man (you want)

Oh yes I am

Girl what's really good with you?

(So when you gone be my girl?)

All this playing up, is getting old now

So baby tell me where I stand

Tell me girl

(I don't mean to be rude but I got to know)

So when you gone be my girl? (When you gone be my  
girl?)

I want to know

When it comes to loving, (why) you change the subject

And girl you know that I'm he man you want (I am the  
man you need)

So baby what's really good with you?

So when you gone be my girl?

All this breaking up, is getting old now

Baby tell me where I stand
