"Poison Eye"

Visit "[Poison Eye](#)" on MotoLyrics.com

I heard the sound bite
I read your words right
I saw the light
I heard you singing
I know this song
It's my turn to write
I put this hook inside
So you won't soon forget
I got the radar
I can see so far

With my poison eye
Yeah my poison eye

When I look hard
I see in the stars
What you've done and what lies
Awaiting for you
When I look down
I see the ground
I won't make a sound
I won't need to look at you

Inside the phone lines
You think you'll hide
And you'll be alright
You're in my sidelines
You'll have no time
Even to cry
I see your pain
I see my face on your fear
I got the radar
I can see so far

With my poison eye

Yeah my poison eye

When I look hard
I see in the stars
What you've done and what lies
Awaiting for you

When i look down
I see the ground
I won't make a sound
I won't need to look at you

I can see sparks
Over a lake at midnight
I see the smiles
Falling from your face
But you're in the dark
You're in a maze
All you can do is sit here and wait for me
And I'm coming

I know the low road
I wrote the code
To break in your heart
I see the angles
I draw the cards
That burden you so
I have the sight
That follows you morning and night
I got the radar
I can see so far
With my poison eye
Yeah my poison eye
My poison eye
