I've heard it said before you got to look hard
You got to find the door and you will see
A bigger love will be revealed to you
The simple truth will set you free, well i'm
Desperate, broken down, out of touch
I need a good friend
Something's steering me way off the road
Grab the wheel cause i'm out of control

Chorus:

Take a look inside my life and see the whole story
Take a look and you will find my heart in your hands
Take me away, don't want to miss the glory
Will you love me once forgive me twice
And take me to beggar's paradise

There was a time when i was skipping wild
Like a little child - it's all right

I was without a care i felt your loving in the air
All day and night, now i'm desperate, broken down, out
of touch
I need a good friend
I can see your bright light up ahead
Can you bring that little child back again?

Chorus

I'm a sould lost and alone until
You take this beggar as your own
Say you will

Take a look inside my life and see the whole story
Take a look and you will find my heart in your hands
Let me see all your glory
Will you love me once forgive me twice
And take me to beggar's paradise

Cause i'm needing you
I can see the bright light up ahead
