"Shine"

Visit "[Shine](#)" on MotoLyrics.com

This city is surrounding me
It's getting slightly harder to breathe
I'm thinking on these memories
Back when you and me were meant to be

You used to be that star in my sky
And now I lost the brightest eyes in my life

You've found another place to shine
Another darkened sky to she'd your light
I wana hold you one last time
But you've found another galaxy
It's far away and out of my reach

This room is closing in on me
These walls they tell the story about you and me
And I can't find the words to say
I miss you more and more each day

You used to be that star in my sky
And now I lost the brightest eyes in my life

You've found another place to shine
Another darkened sky to she'd your light
I wana hold you one last time
But you've found another galaxy
It's far away and out of my reach

Oh, Oh, Oh
I'm so sad to see you go
And I'll miss you so
Oh, Oh, Oh
Is it so bad for me
I know I've got to set you free
