I've seen a lot along the way  
I've felt the kiss that wouldn't betray  
I skipped along just like a child  
Suddenly we felt to the wild  
No one's to blame  
After the storm ; i feel the same

Chorus:

I will be right here waiting  
See the sun rise watch it fading  
I will be right here waiting  
After all i belong to you

Sometimes we push these things aside  
Cause it's easier to live with a lie

It hurts the least and soothes the most  
But i think it's time we give up the ghost  
I need the truth ; nothing but love  
Nothing but you

Chorus

No one's to blame  
After the storm ; i feel the same

Chorus:

I will be right here waiting  
See the sun rise watch it fading  
I will be right here waiting  
After all, after all  
Don't you know i belong to you
