"So Long Good Friends"

Visit "[So Long Good Friends](#)" on MotoLyrics.com

I watched everything go down
I saw the people leave this town
And I saw the beach clear
The winter was coming here
The ocean breeze is making me freeze
The brown leaves are falling down
Are falling down

So long good friends
So long good friends
So long good friends we had before
So long good friends
So long good friends
So long good friends we had before

I watched the stars shine at night
And what the man told me was right
The light are shinning on me
Tonight you're going to see
The years are flying by
And I'm not going to stop and cry
And life just going to be
Make it right and your going to see

So long good friends
So long good friends
So long good friends we had before
So long good friends
So long good friends
So long good friends we had before

So long good friends
So long good friends
So long good friends we had before
