I don't want to be a pillar of the community
I'm not a patriot - I don't believe in this country

[Chorus:]

Chaos is what we need
Chaos for you and me
America is a lie
Reject the system and survive

I know what I see - I know what I feel
Your polite discussion makes me I'll
I see the pain and suffering the media ignores
I know the truth about this country of ours

People see the problems and know there must be
change
But are scared by their leaders who warn chaos will
reign
Chaos is the people's power, a natural equilibrium
To be free you've got to unlock your mind the system
has in chains
