SO IT'S YOU

With a smile and that's how it all started

And you came right in time

When i needed someone

And we said hello suddenly my heart beating fast

****So it's you i've been waiting for so long**

So it's you where were you all along

Very special moments these will always be with me

We are here you and I we belong

We touched and we felt more beautiful

At two hands reaching out

Filled with so much longing

It felt good inside

There is no denying im inlove

(Repeat ******)2x

...We are here you and I we belong
