You know my heart, thought inside my head  
I hear your every word, before a word is said  
Across a room a strangers eyes  
Reach out for mine

Feels like I've known you forever  
Like I couldn't know you more  
Feels like we walk along together  
Somewhere on the road before

And it all seems so familiar  
As you led me to your door  
Feels like I've known you forever  
Forever, forever forever

I've spent light-years chasing down your star  
Making my every move right to where you are  
My future love, my lovers past  
My first and last

Feels like I've known you forever  
Like I couldn't know you more  
Feels like we walk along together  
Somewhere on the road before

And it all seems so familiar  
As you led me to your door  
Feels like I've known you forever

When you hold me it never fails  
There's something in the air  
Something that's always been there

Feels like I've known you forever  
Feels like we walk along together  
And it all seems so familiar  
As you led me to your door  
Feels like I've known you forever

Feels like I've known you forever  
Like I couldn't know you more

Feels like we walk along together  
Somewhere on the road before

And it all seems so familiar  
As you led me to your door  
Feels like I've known you forever
