Solemn she falls from my sight  
Fades like the stars and then she's gone

Bury all the past within  
Further down and further still  
Bury all the past within  
The only words she left behind  
Bury all the past within  
I've nothing lost, but nothing left to lose

[chorus]  
Oh  
Every hour, every day  
Oh  
Screams within her mind  
Time slows, although she can't fight the tide  
Now red suns set forever in her eyes

Bury all the past within  
Quiet lies for quiet sins  
Bury all the past within  
Underneath the skin and bone  
Bury all the past within  
Quiet die her silent cries

[chorus X 2]

Let it fade away
