The ice runs on for miles  
With solitude so close  
We end another day  
And stars light up the skies

So lay your hand in mine  
Your head upon my arm  
The stars, they burn like eyes  
The stars all burn for us

[Chorus]  
Come stand by me  
Laughter calls and drives the wind  
It binds us close, alone but for  
The sparks of heaven's smile  
Knowing you're here  
I will carry on with you  
To walk the worlds, through heavens gate  
We'll shine and light the sky

We have come so far  
Yet there is far to go  
Still the stars burn bright  
Still our eyes burn true

And as the worlds, we walk alone  
And as the stars, we will never fade

[Chorus] x3
