I've seen the future, I've known the past

So come now and join us and death will last

March now my children, let's rule with pride

There is no future, nowhere to hide

We are the doomed

We are the doomed

Bound by your chains, you try to break free

Dreamworld deception - false liberty

Open your eyes, feed off the blind

Nothing remains but death inside

We are the doomed

We are the doomed

Hatred and fear, our lives are secondary

Rage and power, the roads to genocide

Deny, divide, sustain no life

Eat it, burn it, fuck it, you kill it all

We are the doomed

We are the doomed
