All these arguments we break up
To make up brings us closer together
Still can't seem to leave you alone
We go back and forth off and on
So many things I can't ignore
When it comes down to it
You bring out the best and worst in me
My love, my hate, my start, my finish, my good, my bad
My future and past, my now, my then, my enemy, my
friend
My shoulder to lean on, that's what you are

When it come to your love
Ain't much to figure out
You make me feel secure in my mind
There ain't no doubt to when I think about it
It's like your made for me
No matter what I'm facing, you complete my equation
Common denominator, that's what you are
Common denominator, that's what you are
Common denominator, you know what it is
You're the sum of it all there's no remainder

Many people have yet to discover
It's one or the other ain't nobody gonna take your place
No can't nobody take my place
No you make it better where ever
When ever your the answer to the question

When it come to your love
Ain't much to figure out
You make me feel secure in my mind
There ain't no doubt to when I think about it
It's like your made for me
No matter what I'm facing, you complete my equation
Common denominator, that's what you are
Common denominator, that's what you are
Common denominator, you know what it is
You're the sum of it all there's no remainder

When it come to your love
Ain't much to figure out

You make me feel secure in my mind
There ain't no doubt to when I think about it
It's like your made for me
No matter what I'm facing, you complete my equation

When it come to your love
Ain't much to figure out
You make me feel secure in my mind
There ain't no doubt to when I think about it
It's like your made for me
No matter what I'm facing, you complete my equation
Common denominator, common denominator
Common denominator, you know what it is
You're the sum of it all there's no remainder

Common denominator, that's what you are
Common denominator, that's what you are
Common denominator, you know what it is
You're the sum of it all there's no remainder
