Fuck that!
When I die I'd rather go to hell
I speak the fucking truth
Ain't hard to fucking tell
I'd tattoo it! On my fucking face
Fuck you! I'll never fucking change

And if I lose all my friends
I'll lift the fucking bottle
And drink until it ends
You think I'm not that serious
I sit here and pretend
I'm not afraid to die
But my life I will defend

I'm not afraid to die
But my life I will defend x2

When you've come to the end of the road
And all your stores have been told
21 Let me show you what I've done
Your losing battle, I've already won
(Oh) Our wounds become undone
Discover hearts made of gold
21 Let me show you what I've done
Your losing battle, has just begun

I looked into my future!
Was blinded by the light!
On the path now,
Doesn't matter left or right!
Never had to choose
Never said I might
I might be fucking short,
Never intimidated by height!
Baby leave those heels on!
I'm almost at the top.
Not my fucking peak
So I'm never gonna stop!
But maybe I'm too high
Maybe it's the pills I popped
I might fucking die!

When I fucking drop.

I'm not afraid to die,
But my life I will defend x2!

Fuck that!
When I die I'd rather go to hell
I speak the fucking truth
Ain't hard to fucking tell
I'd tattoo it! On my fucking face
Fuck you! I'll never fucking change

And if I lose all my friends
I'll lift the fucking bottle
And drink until it ends
You think I'm not that serious
I sit here and pretend
I'm not afraid to die
But my life I will defend

I'm not afraid to die,
But my life I will defend x2!

When you've come to the end of the road
And all your stores have been told
21 Let me show you what I've done
Your losing battle, I've already won
When our wounds become undone
Discover hearts made of gold
21 Let me show you what I've done
Your losing battle, has just begun
