When you walked into my life
Everything was
black and white
Monochrome was all I knew
'Til the day I met you

Never felt this way before
Now I know my heart is yours
you're painting all my dreams
In every shade I need

Never really saw
the morning sun
When it rises on the ocean
Never knew the sky could
change to gold

You can chase
the darkest night
And the world is
shining bright again
You're the colour in my life
Oh yeah
When I look into your eyes
I can see you
really understand
You're bringing back the
colour in my life

I knew right there
from the start
Your love was a work of art
those impressions
made me see
Everything around me

All I really have to do
Is to take one look at you
And then it's crystal clear
Knowing that you're near
Never really saw

the seasons change
Or the colours of a rainbow
Never knew that
clouds were silver lined

You can chase
the darkest night
And the world is
shining bright again
You're the colour in my life
Oh yeah
When I look into your eyes
I can see you
really understand
You're bringing back the
colour in my life

Never really saw
the morning sun
When it rises on the ocean
Never knew the sky could
change to gold

You can chase
the darkest night
And the world is
shining bright again
You're the colour in my life
Oh yeah
When I look into your eyes
I can see you
really understand
You're bringing back the
colour in my life

Vamonos, SueÃƒno de ti
mi amor
Y te quiero junto a mi
Bailando como dos amantes
Ay ay ay aah
You're bringing back
the colour in my life

You can chase
the darkest night
And the world is
shining bright again
You're the colour in my life
Oh yeah
When I look into your eyes
I can see you

really understand
You're bringing back the
colour in my life
