Just as London got up and New York got to bed
I was climbing the walls with a bomb in my head
No time to change it
(There was) No time to change it
No time to change It, It's the end of the
World

I was a lonely one
Holding up the end of the bar
Just one more excuse to stick around
Don't wanna travel too far
Who turned on the radio
"Here's the news and all of it's bad"--l guess it's that
Someone told me it's only the end of the World

I got up and got out, just a face in the street
(They gonna get you brother --you better run for

Cover)
Headlights cut through the night like a knife in the
Deep
(They gonna get you brother --you better run for
Cover)

No time to change it
No time to change It
No time to change it, it's the end of the World

I got a feeling I've been living at the end of the line
(They got love)
Love on every station but mine

Won't someone give me a sign
(Lord get me outta here)

Sorry if I wasted your time
When you're lonely it's only the end of the World
