### "As Night Calls"

Morning frost settles on the land  
See the gray clouds gather  
All I ever fear is the dawn  
See her fade in to me

Are you still there as night calls?  
Dance to the sound of tears on the cold stone  
For you I pray as night calls  
Dance to the sound of tears on the cold stone

And we were so strong in our day  
Your smile was my heaven  
All I ever fear is the past  
See time fade into me

For everyone falls from me...  
And this age forever  
Stand as the torch that still burns within December rain

And December rain shall ever fall...
