You filled my heatt with love
It will never break apart
Miracle in my eyes
Time is running wild
You know I have lost my way
You know I have got to say
Days like barrlcades have come to an end
A new day has begun
A new day shines like the sun
You give me songs to sing
You give me dreams to dream
All I ever wanted I find here with you
Forget the world is the world
Forget the world is in pain
Somehow it got out of hand
Somehow I don't comprehend
A new day has begun
A new day shines like the sun
Your lips are sweet
It's all I need from life
Love makes angels of us all
I thought I would never meet a girl like you
I know I will never let you go
I will never let this go
A new day has begun
A new day shines like the sun
