Bridge:

Do what you can to see

This here is G&E

[The Grouch]

You say you're that perfect. Nobody's perfect.

[Eligh]

I never make the same mistake twice yeah right

Never take the wrong face on decision in my life

Always have the arch angel hovering over my
shoulders

To reduce confusion when angels become a strangle

Hold on my neck although self respect is the key to any
success

That addresses itself, the word get money

Two fingers plus one to the pencil at an early age
became my stencil

How come the police (whoop whoop) always seem to
catch me

(Where?) Mid sin

So when finite cycles could never reach their peak

But then again

I tend to be lazy, when a vision pays my dreams a visit

Can't see the light quite right

The jack on the rack is too big in the headphones

They don't bump the lamp when fully plastered like a
night light

Hook:

I make mistakes, I'm a man and I can't help it

I make mistakes, I'm a man and I can't help it

I make mistakes, I'm a man and I can't help it

I make mistakes, but I'm a man

Do what you can to see

[The Grouch]

The models I choose to follow (uh ha) they must be
great

I cannot take the bait of any cause I'm tryin' to make a
pretty penny

Quest for the lighting
Put that in my writing (that's right)
Tighten up my inner self
To me that's wealth
I'm stealth with my actions with attraction to a better
way of living
Giving my all daily but maybe
I overlook some things
(Can't see) Grab for the wrong tool
Put my foot in my own mouth
I never be a blabbin' fool
Don't rule out The Grouch (nah)
Cool out my word holds weight when I state
I make it up
I might fuck it up ten times
Suck it up and then I'm
Back on the track to pretend
That no one can contend
What women and men don't descend
But I'm a keep learning till the end
And when
I screw it up again
Hey I'm only human
Experiment gone bad
Check me on what I'm doin' (go head)
Glad-ly except it
Sometimes that's a vice
Mistakes are on thing, but I don't take bad advice twice
The price you pay to go the right way
It may be steeper (yeah)
But keep your eyes on the prize
I'm wise for my failures and tries
Mistakes made once and the bunch I made a billion
times
I got a zillion rhymes
And I'm still gonna climb back on the horse when I fall
off
It's all loss if I don't
It's all loss if I don't
It's all, loss

Bridge:
Do what you can to see. This here is G&E.

[Eligh]
Dove into the caves like Jacque Custos
Never heeding the warning feeling stupid
In the morning, don't I know
I could die slow and miserable
Or suddenly if I don't let go
Of the myth that I don't give a fuck that's wrong (yeah)

right man)
Lookin' like that, might attract, a cat who's got disease
While I'm smokin' cigarette's and beedies
And flippin' these channels to find a smoker with
disease
Internet what can yo expect?
Next
That's not my thought though
Abbots walk slow through life
They say you need to quit to give it up
That' right
Cause I like what it does, it fries in the pub when I
exhale
The same feeling I feel till the day my lungs fail
That's the words of a stubborn fellow
Quite hard to quit the shit that get me in trouble
Don't mean to bust my bubble
But fuck it
I make mistakes I'm a man and I can't help it
