"Beyond The Stars"

Visit "[Beyond The Stars](#)" on MotoLyrics.com

Here in the night
Just you and me
In all of the world
You're all I see

If we could fly away
Together we'll fly someday
And be who we are
Somewhere beyond the stars

If I had the words
To say how I feel
Somehow, someday
These dreams would be real

When I fly so far and free
I want you right next to me
We'll find who we are
Somewhere beyond the stars

If we made a wish
It might come true tonight
Just listen to the dreams in your heart
Hold them and wish them with all your might

(2x)And maybe someday
We'll know how close we are
Love is waiting there
Beyond the stars

We can find our way
Beyond the stars
