"All Of Us Are In Danger"

Visit "[All Of Us Are In Danger](#)" on MotoLyrics.com

When I got the news the world was ending
Panic took me by surprise
I told my neighbor called my sisters
I wanted everyone in sight

All of us are in danger terrible danger
We need to rally to survive
Or else we'll vanish pletely vanish from the earth

We'll confront them and (face them and we) will survive
we will survive
We will be armed (If we don't prevail) If we don't prevail

In time everything we have ever known
Will die we won't die

We've fallen prey to invaders here to decimate out
lives
With secret weapons of destruction
They'll surround us on all sand

They'll put us in cages terrible cages
Starve us till we rot and die unless we stand up
Unite and fight them for ourselves and families

We'll confront them and (face them and we) will survive
we will survive
We will be armed to the teeth If we don't prevail

In time everything we have ever known
Will die we won't die alone

In time everything we have ever known
Will die we won't die alone

In time everything we have ever known
Will die we won't die alone

In time everything we have ever known
Will die we won't die alone
