

Classic Case "Hospitalized"

Visit "[Hospitalized](#)" on MotoLyrics.com

No medication numbs amputation
When it divides your heart from mine
In cardiac arrest

Now we should be hospitalized hospitalized
Wait for relief to arrive
Hospitalized hospitalized
Wait for the pain to subside

Severed ties always ache and they mend
Slower than broken bones and bruises
When it comes to push and shove
There's little room for love

Now we should be hospitalized hospitalized
Wait for relief to arrive
Hospitalized hospitalized
Wait for the pain to subside

Now we should be hospitalized hospitalized
Wait for relief to arrive
Hospitalized hospitalized
Wait for the pain to subside

Wait for the pain to subside
Wait for the pain now
