did you ever feel lost
like no one understands you
and you dont have the strength to talk to anyone that
puts a smile on your face
having one of those days
where everything is wrong
my inspirations gone
and finally reached a point where is more then i can
take

chorus

its been a long long journey getting here
i feel all account and wieri
and the tears are fall
im about to lose it all
thats when you count the river
thats when you silence the sea
i count on you to deliver before i even speak
thats when you quiet every storm
god knows how to stop the rain
thats when you (thats when you)
thats when you
thats when you saved me

did ever feel tired
but you just cant sleep
its hard enough to breath
and impress your ohh
and pleasing everyone makes
makes its one of those days
you feel the worlds againts ya
you walkin the shadows thinking maybe i should just
turn and walk away

chorus

its been a long long journey getting here
i feel all account and wieri
and the tears are fall
im about to lose it all
thats when you count the river
thats when you silence the sea

i count on you to deliver before i even speak
thats when you quiet every storm
god knows how to stop the rain
thats when you (thats when you)
thats when you
thats when you saved me

your the reason why i still keep
keep moving on
your the reason why good things keep happenin to me
without you i dont know where id be (where id be)
never sieze to amaze me
everytime that you saved me

thats when you count the river
thats when you silence the sea
i count on you to deliver before i even speak
thats when you quiet every storm
only god knows how to stop the rain
thats when you (thats when you)
thats when you
thats when you saved me
thats when you saved me
