Baby I forgot somethin', that's why I came home

It's somethin' I really need, I know you thought I was gone

No it's not my gloves, honey, it's not that cold today

It's nothin' I left behind, it's somethin' I got to say

I forgot to say I love you and somethin' else that I missed

To say how much I need you

In a crazy, crazy world like this, it's easy to feel all alone

You give me the strength I need to exist, just hold me and don't let me go

In a crazy, crazy world like this

Sometimes I don't know lately what will ease the pain

On every corner of the street, sometimes it's all too insane

Baby you just got somethin', that's why I came home

It's somethin' I really need an' now we can be alone

I just had to say I love you and somethin' else that I missed

To say how much I need you

Chorus:

In a crazy, crazy world like this, it's easy to feel all alone

You give me the strength I need to exist, just hold me
and don't let me go

In a crazy, crazy world like this, it's easy to fear the
unknown

I always know when faith gives a twist, you'll be there to
soften the blow

(Solo)

In a crazy, crazy world like this, oh

You give me the strength I need to exist, just hold me
and don't let me go

In a crazy, crazy world like this, it's easy to feel all
alone

I always know when faith gives a twist, you'll be there to
soften the blow

In a crazy, crazy world like this, oh

You give me the strength I need to exist, just hold me
and don't let me go

In a crazy, crazy world like this, when all my defenses
are low

I always know when faith gives a twist, you'll be there to
soften the blow

(to fade)
