Disinfect me from myself  
All twisted like my mind  
Ever been so broken hearted  
Ever felt you never made a start on this road  
When she told you you were beauty  
Underneath the earth was blowing deeply glowing  
A happy smile like a baby grows

All the grass twists round your feet  
Pulls you deep beneath the ground  
Oh down we go  
Like a doomed ship

To all the dreams you got

Everybody is like a starling  
Everybody is like an eagle  
Sometimes we are deadly vicious  
Sometimes we are massive giants

To all the dreams you got
