

Clawfinger "Breakout"

Visit "[Breakout](#)" on MotoLyrics.com

Embrace the child inside you don't hesitate to let him
shine
It takes a laugh or two go with your heart and free your
mind
Don't try to be adult it doesn't lead to anywhere
It's no one else's fault your own emotions make you
scared

Just face the fool in you and let taht sucker slip on out
Don't try toplat it coll that's not what life should be
about
It only takes a smile and suddenly you've dropped your
guard
And make another friend it doesn't have to be hard

Breakout, embrace the child inside you
Take off that mask and show your face
Breakout and face the world around you
Wake up and cut straight to the chase

You're chasing waterfalls instead of racing up the
stream
Just make the most of life and live out all you wildest
dreams
Just let the fuckers out let go of everything you've got
Instead of wasting time by being someone that you're
not

You're place is here and now don't let nobody grind
you down
You can't be ridiculed don't be afraid to be a clown
Let go of all your prideand find your way down to the
core
A stuck up attitude turns you into a crashing bore

Breakout, embrace the child inside you
Take off that mask and show your face
Breakout and face the world around you
Wake up and cut straight to the chase
