This is the way  
That I state my independence  
That I'm no longer connected  
To your memory  
This is the day  
That I'm making my defection  
That I claim back the affection  
That you stole from me  
I used to hear your music so loud  
But it's so wrong  
You're just another face in the crowd  
I'm letting you know

Chorus  
No more sad song  
I'm letting it go now  
Switched off, switched on  
I'm letting you know  
You turned out the light  
I'm gonna be alright without  
Turn the radio off  
No more sad song

These are the words  
To describe all your offenses  
You said love in the past tense  
And then you let it go  
Haven't you heard  
You are no longer respected  
You are formally rejected  
From the one you hurt  
I used to have the longing to hear  
What was in your heart  
But now it seems I'm over the fear  
Of this falling apart

Chorus
