(Kim Williams/Clay Walker/Kent Blazey)

The wind was blowing through your hair  
The moon was shing on your face  
You looked like a picture sittin' there  
And time stood still there in that place  
The water was singin', out hearts were beatin' fast  
Two high school lovers thinkin' it would always last

Down by the riverside on a warm summer night  
We gave into passion for the very first time  
We fumbled with love 'til we got it right  
And we found heaven down by the riverside

Now you're nothin' but a ghost  
That still haunts my memory  
And you're always waitin' there  
When I go walkin' through my dreams  
There's no happy ending but I know our love will last  
'Cause when I close my eyes you always take me back

Down by the riverside on a warm summer night  
We gave into passion for the very first time  
We fumbled with love 'til we got it right  
And we found heaven down by the riverside

On a warm summer night  
We gave into passion for the very first time  
We fumbled with love 'til we got it right  
And we found heaven down by the riverside
