I remember when it all began
You couldn't keep your body from my hands
I remember nights we felt so close
How we got so distant, I don't know

So as you plan, your brand new life
Keep this one thing in mind

If you ever feel, like lovin' me again
The door's wide open, baby walk right in
I'll be waitin', 'til the end of time
Heart and mind, now just like back then

If you ever feel like needin' someone
Who will love you like I've always done
Girl, I'll show you some things never end
If you ever feel like lovin' me again

People change and baby so do dreams
They move along to where the grass is green
So I won't hold you down to what we had
Last thing I wanna do is make you sad

But if things don't fly your way
Girl, it's never too late

If you ever feel like lovin' me again
The door's wide open baby walk right in
I'll be waitin' 'til the end of time
Heart and mind now just like back then

If you ever feel like needin' someone
Who will love you like I've always done
Girl, I'll show you some things never end
If you ever feel like lovin' me again

If you ever feel like needin' someone
Who will love you like I've always done
Girl, I'll show you some things never end
If you ever feel like lovin' me again
