I can see your shadow laying in the moonlight
I can feel your heartbeat playing on my right side
Every night I long for this, makin' up what I miss
I can hear you breathing letting out a sad sigh

You try so hard to hide your scars
Always on your guard

Chorus
Don't, don't let me go
Don't make me hold on when you're not
Don't, don't turn away
What can I say so you won't
No don't, don't let me go...

I can see the skyline fading in the distance
Tears are comin' down
I'm trying just to make sense

I don't listen to the radio just the engine and the road
I wonder if my words are makin' any difference

I dream and then it seems to end
But always comes again

Chorus

I'm comin' down
To where you're standing
I need you now or you'll be watchin'
Me hit the ground
With crash landing...

Chorus

Don't let me go...
Don't let me go...
