This was our love for the very first time
This was our love for the very first time
You were dancing, I was singing
Well it really wasn't my kind of place
You were carefree, I was nervous
You were no more than just another face.

This was our love for the very first time
This was our love, very first time
I was working hard, you looked so cool
And I was thinking still an hour to go.

Your friends were drinking
But you seemed to listen
Well it was no more than just another show.

And this was our love for the very first time
This was our love, very first time
Just as I was losing interest
Just as I was losing heart
You looked and me and smiled
Took my part.

And this was our love for the very first time
This was our love, the very first time.

INSTRUMENTAL

Just as I was gettin' to know ya
Loving your misty gaze
Morning comes and we go
Our separate ways.

And this was our love for the very last time
And this was our love for the very last time
And this was our love for the very last time
And this was our love for the very last time
(Repeat and fade).
