Smile

Like you've got nothing to prove

No matter what you might do

There's always someone out there cooler than you

I know that's hard to believe

But there are people you meet

They're into something that is too big to be

Expressed

Through their clothes

And they'll put up with all the poses you throw

And you won't

Even know

That they're not sizing you up

They know your mom fucked you up

Or maybe let you watch too much TV

But they'll still look in your eyes

To find the human inside

You know there's always something in there to see

Beneath

The veneer

Not everybody made the list this year

Have a beer

Make me feel tiny if it makes you feel tall

But there's always someone cooler than you

Yeah, you're the shit

But you won't be it for long

Oh, there's always someone cooler than you

Yeah, there's always someone cooler than you

Now that I've got the disease

In a way I'm relieved

Cause' I don't have to stress about it like you do

I might just get up and dance

Or buy some acid washed pants

If you don't care

Then you got nothing to lose

And I won't
Hesitate
Cause every moment life is slipping away
It's ok

Make me feel tiny if it makes you feel tall
But there's always someone cooler than you
Yeah, you're the shit
But you won't be it for long
Oh, there's always someone cooler than you
Yeah, there's always someone cooler than you
Oh, there's always someone cooler than

Life is wonderful
Life is beautiful
We're all children of
One big universe
So you don't have to be
A chump

And you know
(You know)
That I won't
(I won't)
Hesitate
(Hesitate)
Cause every moment life is slipping away
(Away)
It's ok
(It's ok)

Make me feel tiny if it makes you feel tall
'Cause there's always someone cooler than you
Yeah, you're the shit
But you won't be it for long
But there's always someone cooler than you
Oh yeah, there's always someone cooler than you
Because there's always someone cooler than you

Cooler than you
Boy
Cooler than you
Girl
Cooler than you
Sir
Cooler than you
My Lady
OH!

Nerds gone wild
Yeah yea
