So you wanna suck glass cock?
Livin' on a Hawthorne rock?
It's a life that you can't cop
Another ten that I just dropped

One day I met a busted, broken kid just looking to be
fixed
Desperation and despair 1-9-86'd
It's a needle in your arm when you don't mean any
harm
(What the fuck went wrong?)
Same old story on and on, see my friends drop like
bombs

Don't matter where you live this shit just don't give
Spreading faster than the HIV from Compton to
Cambridge
What happens now? Don't think you know!!
Go to the corner take a stroll
Pay the toll in espanol
Try and try but he can't stop
Try and try just hits a rock

Kerosened self-esteem low ends don't get you clean
(Just can't let it go)
Black and white it takes no sides, new problems on the
rise
Pawned lives and destroyed minds
Can't live a normal life when you're so far out of
your mind

There's no turning back, he's caught in a crack
There's decisions that we've made, there's games
that I've played
But it's a chance that you take and it's a promise
that I break
We're all caught in our cracks
