

Clit 45 "No Surrender"

Visit "[No Surrender](#)" on MotoLyrics.com

Everywhere we go all we get is degradation
In our jobs on the streets they want the punks
annihilation
Break you down then brainwash you I've seen so many
fall
But I don't care for acceptance cause I fucking hate
them all

[Chorus:]
Out of place But I won't surrender

They want you to change, bow down and kneel
Words don't mean a thing when your mind is made of
steel
They get power through possessions, ours comes
through our ideals
Might not have shit but we stand for something real

They want you to think You can't make it on your own
That you're all alone
That your life is a waste
You're not like them cause you're out of place
