A digital murder  
Programmed by mathematical terrorists  
Outside of mortal bounds  
Silently hacking  
A binary plague  
Serving information  
This is the time of the hacker  
This is the code of the hacker  
This is the hacker  
An algebra of fear  
Within the language of machines  
Uninfringed my human emotions  
Within global systems  
Silently moving  
A digital maze  
Cutting information  
This is the way of the hacker  
This is the extremity of the hacker  
This is the hacker  
Protect now or be erased forever  
A binary virus  
Unleashed by subversive programmers  
Inside corporate systems  
Silently eating  
The endemic wave  
Erasing information  
This is the sign of the hacker  
This is the genius of the hacker  
This is the hacker  
Learn now  
Or be cut down forever
