Face to face, body to body
Face to face, body to soul
Face to face, come on everybody
Face to face, body to soul allright

When you move you're so sensual
You have got love potential
Hey, can't you feel it growing
My love is overflowing

Forget about the bad times
and leave 'm all behind you, baby
Come and feel my rhythm and music
I'll show you how to drive me crazy

Face to face, body to body
Face to face, body to soul
Face to face, come on everybody
Face to face, body to soul allright

Tonight we're undercover
You are the perfect lover
Baby, I ain't taking
my body starting aching

Forget about your worries
and dance into a night of pleasure
Come and feel my rhythm and music
I'll show you how to dig my treasure

Face to face, body to body
Face to face, body to soul
Face to face, come on everybody
Face to face, body to soul allright

You can get it if you want it
are you gonna take me high
If you want it you can get it
if you are the kind of guy
