Sinking in the sunset here alone with you  
A photograph so perfect we'll just stay and never move

But it comes and it goes so fast  
We can make it last

Taste the summer afterglow  
And take it with you when you go  
Remember me when you're back in school  
If you can't make it through  
'Cause every moment in your life  
Comes down to what you hold inside

I don't have to know you  
I just wanna hold you tonight

Closer than it's ever been with anyone  
Living for the moment there's a flash and then it's gone  
Is it killing you like it's killing me tonight  
Just remember what it's like  
Remember

And you had to go  
So far away, far away, away  
But you'll never be alone
