White lights flashing  
Blood pouring violently, fight, got to get through  
Got to reach till we find You, got to find You, oh, oh, oh

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You

Whispers  
I can hear You screaming silently  
Cries of joy, pain or is it healing? Oh

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You

Got to fight, got to fight till we reach You  
Got to reach till we find You  
Got to fight, got to fight till we reach You  
Got to reach till we find You
