"There Is A Word Hidden In The Ground"

There's a word hidden in the ground as sure as my
voice.
My travels in the past did very little to prepare me for
today.
To dictate my hates and lusts,
To form an anthem to incite that same reaction, it fell
short.
Where trailblazers set forth a new rebellion,
And cried like children when it came back home to
deplete their fortunes.
We can not choose our effects without the risks.
We can't pick and choose our mark on the world when
we believe our own lies.
I found worth in words that were not mine.
I seek a path to be content with my failures in the
works, and my journey.
I've been a dead man before, in spirit and in flesh.
In both cases my will is not what saved me.
