She told me I'm a lot like a late night talk show  
You wait long enough all's revealed, and then it's gone  
Coffee keeps me alive on my late night talk show  
Then I change as I leave the live studio  
And everybody knows that casualness causes  
casualties  
You wouldn't guess that it's mostly my fault  
And every show sucks as a result of me  
You've now seen all the possibilities  
My pathetic friend  
It's been a tough week on the late night talk show  
I just can't afford what I need to know  
Gotta get away from the late night talk show  
Gotta drive as far as the car will go  
And everybody knows that casualness causes  
casualties  
You wouldn't guess that it's mostly my fault  
And every show sucks as a result of me  
You've now met both my personalities  
My pathetic friend  
Attack the viewers  
God knows they've seen it all before  
Just keep your mouth shut  
God knows I've heard it all before  
Will you be a guest on my late night talk show  
Just relax and I'll give you the third degree  
Do you want a job on my late night talk show  
You can be the director and fuck with me  
And everybody knows that casualness causes  
casualties  
You wouldn't guess that it's mostly my fault  
And every show sucks as a result of me  
You've now met both my personalities  
My pathetic friend  
My pathetic friend  
Is me, is me  
My pathetic friend  
Is me, is me
