"Don't Count Your Cobras Before They Hatch"

Visit "[Don't Count Your Cobras Before They Hatch](#)" on MotoLyrics.com

At conception you say the zygote and the soul
are joined in holy union and that's all we need to know
millions with cancer, Parkinson's and hear disease
but protecting little stem cells puts your little mind at
ease

it's just a blastocyst, 150cells
a blastocyst, that's what you care about
never mind the help we could be giving
never mind the suffering occurring in the living

you won't protect a human quite like you will an egg
cultured in vitro for three to five days
millions with damage to the spinal cord and brain
but you're priority's a stem cell as if it felt pain
