Simon, my brother, first man I loved  
Or should I say that he loved me  
I was in second grade, he was fourteen  
In the shady of the trees  
It was a summer breeze  
Whole thing's a blurry dream  
Behind the house quiet as a mouse  
He told me not to breathe  
A secret hard to keep  
I didn't know till thirteen  
By then I knew just what to do  
It was just an old routine  
All the boys they fell in love with me  
All the boys had a thing for me

CHORUS: x2

You see me trying to smile up on this pole  
But I'm just hiding the pain that's deep in my soul  
You wanna fuck me  
I already know  
You wanna fuck me and toss me back on the floor

My mama she always said to me I am the brightest star  
In life, you're sure to go so far  
But I've been at this club about four years  
Hooked on dope, crying in the mirror  
When we were just little girls  
We learned to dance in mama's pearls  
Baby bend over and shake that ass for me  
Hoping you fall in love with me  
I could make love to you for free  
We could just get a place and start a life  
And try to make things right.

CHORUS: x4

You see me trying to smile up on this pole  
But I'm just hiding the pain that's deep in my soul  
You wanna fuck me  
I already know  
You wanna fuck me and toss me back on the floor
